Q5 - What would you change about the Oat Newsletter to better meet your needs? (add, expand, remove)

What would you change about the Oat Newsletter to better meet your needs? (...)

The website isn't always easy to navigate

Unsure. I'm more focused on the breeding side so perhaps more info there, field season notes and opinions?

add a relevant jobs message board

Oat information from other regions in the world. There is a dominance of information from Western Europe and Northern America.

For me- it's perfect thank you so much! :-)

Maybe update the format

Nothing.

More examples from GrainGenes. We need to begin to add new data to announce.

keep the same

No change needed, I'm, retired.

I believe the Oat Newsletter does a good job of providing information of interest to a broad community, so if something isn't of specific interest to me, I know it would be of interest to others within that community.

It's too difficult to actually find what I need as it's not really a newsletter but links

expand

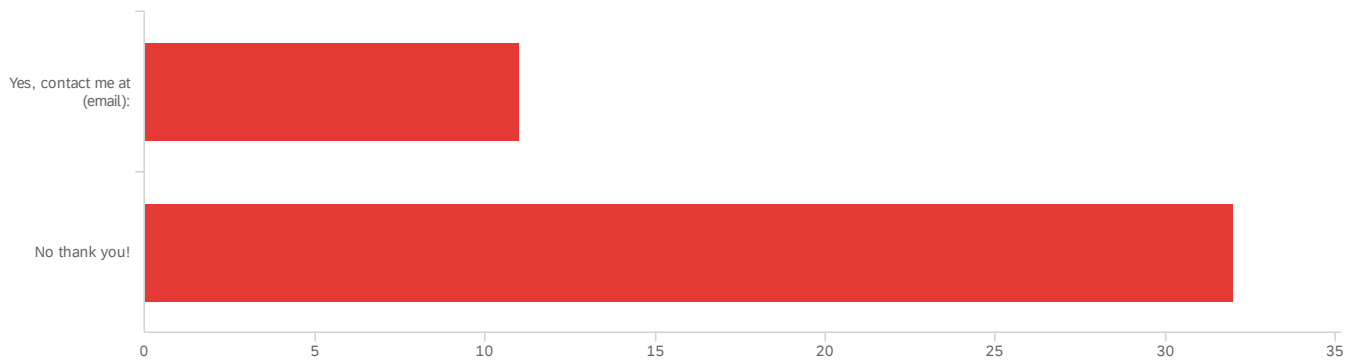

No change is needed, just the way it is running

More research articles

As a specialist user we would not expect the much of the content to be relevant

Probably more references to interesting public articles. Additionally great if we could encourage a country by country review. From crop and yield to market.

Q18 - Would you be willing to participate in a newsletter committee?

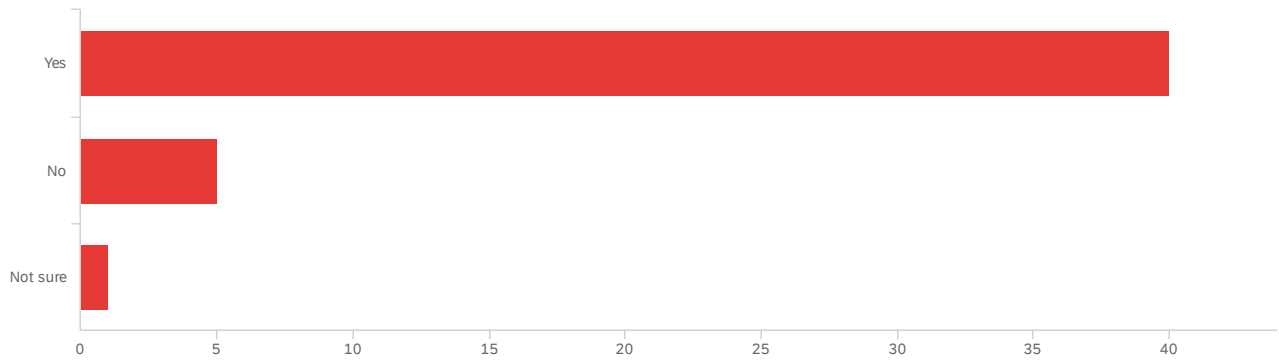

#	Field	Minimum	Maximum	Mean	Std Deviation	Variance	Count
1	Would you be willing to participate in a newsletter committee? - Selected Choice	1.00	2.00	1.74	0.44	0.19	43

		44

Showing rows 1 - 4 of 4

Q22 - What do you perceive as being the primary role of Oat Global?

What do you perceive as being the primary role of Oat Global?

Connecting the International Oat Community

I'm a bit unclear at the moment- it was quite clear and then seemed to become an industry member organisation

Communicating key events and research topics to oat workers

Unsure

promoting coordinated work across the industry and academia in the pre-commercialization space to help everyone

Establishment of a real global oat network.

Promote support for oat research and industry.

Not certain

inform about projects and events

I would like to know more about it!

Admittedly, I could be more in tune with Oat Global. I plan to be in the future. It seems an important resource to bring together oat workers around the globe.

Coordinating research

Create, or bust, interest in oat

Connecting and bringing together the industry

Bringing the community together; discovering granting sources and communicating that to the community

garnering funding

gathering researchers together

information sharing

informing the global oat community on initiatives, research update, oat production statistics

Advocacy, networking

Connecting the oat community

Speaking of Oats, newsletter, ION

Q24 - How do you think Oat Global can better serve the global oat community?

How do you think Oat Global can better serve the global oat community?

Broader focused - more international participation

Collaborative international research

Already does well communicating with oat workers within the resources available to it

create shared tools and datasets for all in industry and academia to use

Inclusion of oat people from further countries. There is overdominance of Northern American oat topics.

I'm not sure how it is currently serving the global oat community.

Be more visible

Guiding us about specific interests of the industry, local goals, etc.

Host in person meeting?

Have more of a Canadian Focus since the majority of oats are grown there

concrete goals

Have not thought much on this

Formal link with International Oat Conference (and AOWC?)

SOO is great, maybe some in person meetings?

Q25 - Is there any particular research area you think Oat Global should emphasize? Feel free to elaborate.

Is there any particular research area you think Oat Global should emphasize...

No

The entire value chain!

You could consider forage options. Oat is a popular cool season forage (plus legumes) with farmers in developing economies

predictive analytics for oat crown rust risk and other imminent threats

No.

What research areas does Oat Global currently emphasize?

Better platforms for phenotypic and genotypic characterization of oat germplasm

Increase of area under winter oat cultivation due to climate changes.

I'm particularly interested in the Breeding area, but this doesn't exclude other areas...

Crown rust

Agronomy???

crown rust!

Emphasize more on disease and pest issues for oat production
